

# Solarium is closing its doors on 7th November 2025.

Solarium is officially closing down soon. After many years, it's time to say goodbye.

Why is this happening? The simple truth is, Solarium has been inactive for over 3 months now, and with no signs of any development, we felt it was best to officially shut down Solarium. This decision wasn't easy to make. Many of you started making concepts at Solarium, and saw the studio and company as a whole as your place to create and explore new ideas. We aren't deleting the Solarium studio, preserving it as an archive of the things that we made together.

If you have a Solarium device made from 2024 onwards, you can download fusionOS 2, the new Flux phone experience, today! We want to continue to support your device for years to come, so we are providing you with a free upgrade to the Flux platform.

Again, thank you for the amazing things we made as a community. Farewell, Solarium!
